Peka Forte - Heavy Duty Full Extension Runner for Pull Out Storage - 480mm

Variant code: 100.1370.14

The **peka Forte heavy-duty drawer runner** is engineered to support **custom-made wooden pull-out units** where high load capacity, stability, and design flexibility are critical. Manufactured by **peka of Switzerland**, Forte is designed for demanding furniture applications including **tall larder units, wide pantry pull-outs, and bespoke storage cabinets** across residential, commercial, and industrial environments.

Designed as a **full-extension runner**, peka Forte provides complete access to cabinet contents, even in deep or tall installations. Each runner supports loads of up to **170 kg**, or **up to 340 kg when used in a coupled configuration**, making it suitable for heavy, fully loaded pull-outs without compromising smooth movement or control. The runner is **mounted at the base and at the top**, ensuring stability across all cabinet widths and supporting interior heights of up to **2400 mm**.

Concealed runner technology allows the hardware to remain visually discreet, enabling the furniture design to take centre stage. For enhanced user comfort, an **optional soft-close module** can be specified to guide the pull-out through the final phase of closing. With **pre-assembled components**, front adjustment, and compatibility with **automatic screwdrivers**, peka Forte is optimised for efficient, repeatable installation in professional furniture manufacturing and joinery environments.

Please note: This product includes **1 full-extension drawer runner and 1 upper slide only**.

Product Features

- Heavy-duty **full-extension drawer runner** for wooden pull-out units
- Load capacity up to **170 kg per runner**
- **Up to 340 kg load capacity** when used with coupled runners
- Base-mounted and top-mounted

installation for enhanced stability

- Concealed runner technology for clean cabinet aesthetics
- Durable, quiet running performance under heavy loads
- Compatible with optional soft-close functionality

Product Benefits

- Enables **wide, deep, and tall pull-out cabinets** with confidence
- Provides **full visibility and access** to stored contents
- Maintains smooth, controlled movement even at high load levels
- Supports **bespoke furniture design** without visible hardware
- Reduces installation time with **pre-assembled components**
- Delivers long-term reliability in **high-use environments**

Technical Characteristics

- Heavy-duty drawer runner for **single or dual runner configurations**
- Load capacity of **170 kg per runner** or **340 kg when coupled**
- Available in **multiple runner lengths** to suit cabinet depth
- Suitable for **interior heights up to 2400 mm**
- **Base-mounted and top-mounted** design for cabinet stability
- Manufactured from **powder-coated steel**
- Finished in **light grey**

Applications

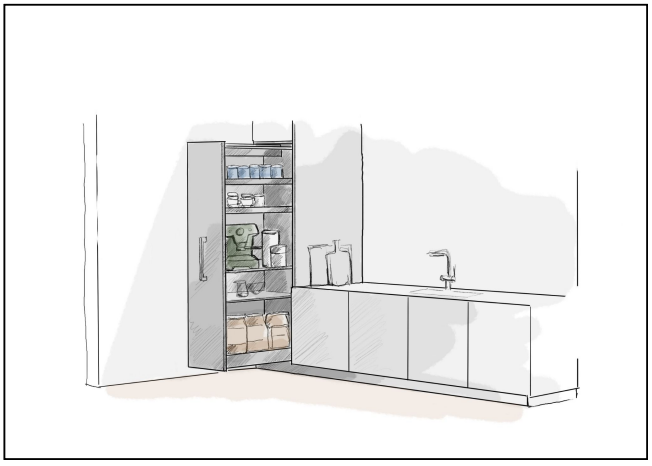

The **peka Forte drawer runner** is ideal for **kitchen larder pull-outs**, **pantry cabinets**, **workshop storage**, and **custom-built furniture** where high load capacity and controlled movement are essential. It is particularly well suited to **non-standard cabinet sizes**, tall interiors, and wide pull-outs that require additional stability. Whether used in **residential kitchens**, **commercial interiors**, or **industrial storage solutions**, peka Forte delivers reliable performance while remaining discreetly integrated within the furniture design.

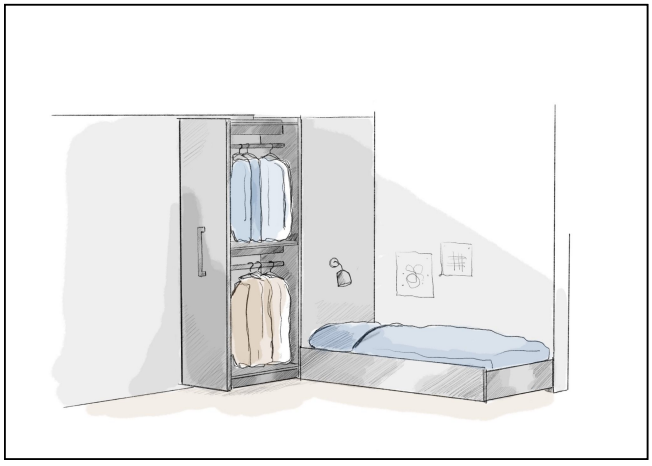

Property	Value
Single Set: Load Capacity (kg)	170
Double Set: Load Capacity (kg)	340
Depth (mm)	480
Width (mm)	120
Height (mm)	127
Minimal Internal Cabinet Depth (mm)	485
Single Set: Interior Width (mm)	124-568
Double Set: Interior Width (mm)	252-768
Internal Cabinet Height (mm)	400-2400
