

PIXEL 20° Angled Surface Mount Spacer 35mm ø x 21mm – Satin Nickel

Variant code: LLP240352SN

The **PIXEL 20° Angled Surface Mount Spacer** is a dedicated mounting accessory designed for use with the **Domus Line PIXEL Micro Spot Light**. It allows the spotlight to be surface mounted while positioning the light at a **20° angle**, making it ideal for directing accent lighting precisely where it is needed.

Designed to complement the compact PIXEL spotlight, the spacer provides an alternative installation method where recessed mounting is not practical or desired. The angled design enhances the spotlight's symmetrical light projection, making it particularly suitable for illuminating the interior of **glass display cabinets**, shelving and display furniture.

Measuring **35mm in diameter** and **21mm high**, the spacer provides a neat and professional finish while maintaining the minimalist appearance of the PIXEL lighting system. **Please note: PIXEL Micro Spot Light is sold separately.**

Product Features

- Surface mounting spacer for the Domus Line PIXEL Micro Spot Light
- Positions the spotlight at a fixed 20° angle
- Alternative to recessed installation
- Ideal for directing accent lighting
- Dimensions: 35mm diameter x 21mm height
