PIXEL Straight Surface Mount Spacer 35mm ø x 21mm - Black

Variant code: LLP240351BK

The **PIXEL Straight Surface Mount Spacer** is a dedicated mounting accessory designed to convert the **PIXEL micro spotlight** into a neat surface-mounted lighting solution. The spacer positions the spotlight to protrude **21mm** from the mounting surface, making it ideal for applications where recessed installation is not possible while maintaining the compact, minimalist appearance of the PIXEL lighting range.

Designed exclusively for use with the **PIXEL micro spotlight**, the spacer provides a secure and professional surface installation for furniture, shelving and display cabinets. Its low-profile design preserves the elegant styling of the luminaire while offering greater installation flexibility for bespoke furniture and cabinetry projects.

Please note that the **PIXEL spotlight, LED converter and associated lighting accessories are sold separately**. This product includes the surface mounting spacer only.
