Push Knob Latch - Square - Chrome

Variant code: DPL-SQ-CR

Push Knob Latch is a stylish and practical **push-to-open cabinet latch** that combines a flush pull knob and secure latch into a single compact unit. Finished in **Chrome**, it provides a clean, modern appearance while offering simple one-touch operation, making it ideal for cabinetry, furniture and marine applications where a flush finish is preferred.

Designed for convenience, the knob remains **flush with the door surface** when not in use, creating a neat, snag-free profile. Pressing the knob causes it to **pop out**, allowing the door to be opened comfortably. When pushed back into the door, the mechanism securely latches the door closed, eliminating the need for separate handles or catches.

Suitable for **door thicknesses from 15mm to 25mm**, the latch provides a **10kg holding force** for secure door retention. Its **non-handed design** allows installation on either left or right-handed doors, offering flexibility across a wide range of furniture and cabinet applications.

Ideal for modern interiors, caravans, motorhomes, boats and commercial furniture, the Square Push Knob Latch combines elegant styling with reliable everyday performance.

Product Features

- **Square push knob and latch combination**
- Chrome finish
- Flush knob design when closed
- Push-to-release operation
- Knob pops out for easy opening
- Automatically latches when pushed closed
- Suitable for **15mm–25mm door thickness**
