

Rim Lock – Large – Left Hand – Iron

Variant code: 83591

Rim locks are fitted to the surface of the door rather than being morticed in, along with a surface mounted keep that should be fitted to the door frame.

Our weighty rim lock range is forged from solid brass which emphasises the high quality materials and manufacturing techniques used. A perfect design choice to use throughout your property with many other matching products available.

Our rim knob range is used in conjunction with our rim locks to provide an attractive, high quality finish to any period town house or country property.

- The product is handed and therefore care needs to be taken when choosing the correct hand. If your door is inward opening and hinged on the left then a left hand rim lock is required.
- All our rim locks are KA.
- Supplied with matching SS wood screws.

Range	Rim Lock

Gallery

Technical drawing of the Left Hand Rim Lock - Large. The drawing includes three views: a front view, a side view, and a detail view of the rim lock. The front view shows a rectangular plate with a central keyhole and four mounting screws. Dimensions include a width of 180mm, a height of 112mm, and a mounting hole spacing of 127mm. The side view shows the lock's profile with a height of 16mm and a mounting hole spacing of 20mm. The detail view shows the rim lock with a height of 26mm and a mounting hole spacing of 20mm.

Please Note, due to the hand crafted nature of our products all measurements are approximate and should be used as a guide only.
