# Rim Lock - Small - Right Hand - Polished Brass

**Variant code: 83580**

Rim locks are fitted to the surface of the door rather than being morticed in, along with a surface mounted keep that should be fitted to the door frame.

Our weighty rim lock range is forged from solid brass which emphasises the high quality materials and manufacturing techniques used. A perfect design choice to use throughout your property with many other matching products available.

Our rim knob range is used in conjunction with our rim locks to provide an attractive, high quality finish to any period town house or country property.

- The product is handed and therefore care needs to be taken when choosing the correct hand. If your door is inward opening and hinged on the right then a right hand rim lock is required.
- All our rim locks are KA.
- Supplied with matching SS wood screws.

| Property | Value |
|---|---|
