Salice Air Restrictor for Concealed Hinge

Variant code: SEL637X3

The **Salice Air Restrictor for Concealed Hinge** is a genuine accessory designed to optimise the performance of Salice Air concealed hinges by limiting the door opening angle to **92°**. Ideal for applications where space is restricted, this compact restrictor helps prevent cabinet doors from striking adjacent furniture, walls, appliance handles or other obstacles, protecting both the furniture and surrounding surfaces from accidental damage.

Designed specifically for seamless compatibility with the **Salice Air concealed hinge system**, the restrictor fits discreetly within the hinge assembly without affecting the clean, minimalist appearance of the cabinet. Its durable construction provides consistent and reliable angle limitation, while the simple insert-and-click installation makes it a quick upgrade for new furniture or existing installations.

Perfect for modern residential and commercial cabinetry, the Salice Air Opening Restrictor enhances furniture longevity by controlling door movement while maintaining the premium performance and elegant aesthetics expected from Salice hardware.

Product Features

- Genuine Salice Air concealed hinge opening restrictor
- Limits door opening angle to 92°
- Designed specifically for Salice Air concealed hinges
- Compact concealed design
- Insert-and-click installation
- Durable, high-quality construction
- Helps protect adjacent cabinets, walls and appliances
- Suitable for new installations and retrofit applications

Product Benefits

- **Restricts door opening to 92° to help prevent accidental impact damage**
- **Protects cabinet doors, neighbouring furniture, walls and appliance handles**
