

Salice Air Restrictor for Concealed Hinge

Variant code: SEL637X3

Give your furniture doors and cabinetry the **precision** and **protection** they deserve with the **Salice Air Restrictor for Concealed Hinges**. This essential accessory is engineered to **optimise** your hinge performance, providing a **controlled** 92° opening angle—the **ideal solution** for preventing doors from striking adjacent cabinets, walls, or appliance handles.

Key Features & Benefits

- **Precision Opening:** Limits the door opening angle precisely to **92°**, offering the **perfect balance** between accessibility and restraint.
- **Ultimate Protection:** **Safeguards** your furniture, walls, and surrounding objects from **damage** caused by aggressive or wide door openings. This **preventative measure** ensures the **longevity** and **pristine condition** of your cabinetry.
- **Seamless Integration:** Designed specifically for **Salice concealed hinges**, the Air Restrictor fits **snugly** and **discreetly** within the hinge cup, maintaining the **sleek, clean aesthetic** of your installation.
- **Enhanced Durability:** Made with **high-quality, robust materials** for **reliable, long-term** performance and **consistent** angle limitation.
- **Quick & Easy Installation:** The restrictor is a simple **insert-and-click** component, making **installation effortless** and **hassle-free**—a **fast upgrade** for any Salice hinge setup.
- **Noise Reduction:** By **controlling** the door's momentum, it contributes to a **quieter** and **smoother** closing operation, enhancing the **premium feel** of your cabinets.
