Salice Corner Connectors for Air Aluminium Door Profile - Pack of 4

Variant code: DEL6BSFV02

The **Salice Corner Connectors for Air Aluminium Door Profile** are genuine assembly components designed to create strong, accurate 90° joints when constructing doors using the **Salice Air Aluminium Door Profile**. Supplied as a **pack of four**, this set contains all the connectors required to assemble one complete aluminium door frame, ensuring exceptional strength, alignment and a clean, professional finish.

Engineered specifically for the Salice Air system, the connectors fit discreetly inside the aluminium profile to create concealed corner joints without visible screws or external fixings. Their precision design helps maintain perfect frame geometry, providing the stability required for reliable operation with concealed hinges or sliding door systems.

Manufactured from durable, high-quality materials, these genuine Salice connectors offer long-lasting performance and are ideal for contemporary wardrobes, kitchen cabinetry, display furniture and bespoke aluminium-framed doors where precision and aesthetics are equally important.
