

Salice Corner Connectors for Air Aluminium Door Profile – Pack of 4

Variant code: DEL6BSFV02

Salice Corner Connectors for Air Aluminium Door Profile – Pack of 4

Designed with **precision engineering** and **uncompromising quality**, these Salice Corner Connectors are the fundamental hardware required to build a **robust, flawless, and aesthetically pleasing** frame using the innovative **Salice Air Aluminium Door Profile**. This pack provides all the necessary components to assemble **one complete door frame**.

Key Features and Benefits

- **Perfect Compatibility:** Specifically designed for exclusive use with the **Salice Air Aluminium Door Profile**. Ensures a seamless and precise fit for optimal structural integrity and visual appeal.
- **High-Strength Construction:** Made from durable materials to guarantee a **strong, rigid 90-degree corner joint**, essential for the stability and longevity of your cabinet doors.
- **Concealed Assembly:** The connectors are designed to be installed **internally** within the profile's cavity, resulting in a **clean, uninterrupted external frame appearance**. No visible screws or fasteners detract from the minimalist design of the Air profile.
- **Easy Installation:** Features a practical, straightforward design that allows for **quick and efficient assembly** of the door frame, saving time during furniture production or installation.
- **Optimal Alignment:** Aids in achieving **perfect geometrical alignment** of the four profile segments, which is critical for smooth operation when used with hinges or sliding systems.
- **Versatile Application:** Ideal for custom-built wardrobe doors, kitchen cabinets, and display cases utilising the modern, slender look of the Salice Air frame system.

Technical Specifications

Feature	Detail
Product	Salice Corner Connectors
Profile Compatibility	Salice Air Aluminium Door Profile (Sold Separately)
Angle	90 degrees (Right Angle)
Material	High-Quality Metal/Polymer Composite (for strength and durability)
Finish	Unfinished / Internal Use
Pack Contents	4 Connectors (Sufficient for one door frame)
Mounting	Insert/Screw-In Internal Connection

Installation Tip

To ensure a secure and durable frame, the connectors are inserted into the open ends of the **mitre-cut** (typically 45 degrees) aluminium profiles and then fastened according to the Salice Air system specifications (often involving a securing grub screw or clip mechanism).

Why Choose Salice?

Salice is globally recognised for its **cutting-edge hardware solutions** in the furniture industry. By choosing genuine Salice components, you are investing in **reliability, innovation**, and products that ensure the smooth functionality and superior finish of your furniture projects.
