

Salice Air Holders for Arm – Titanium

Variant code: SELX77X6

The **Salice Air Holders for Arm** are genuine accessories designed to provide secure support and smooth operation within the **Salice Air lift-up door system**. Finished in an elegant **Nickel Plated** coating, these premium holders help deliver controlled, reliable movement while maintaining the clean, minimalist appearance of contemporary cabinetry.

Engineered to Salice's renowned Italian quality standards, the holders provide excellent stability for lift-up and parallel-opening door applications, ensuring consistent performance and dependable support throughout the opening and closing cycle. Their compact design allows the mechanism to be discreetly integrated into the cabinet, preserving valuable internal space and enhancing the overall furniture aesthetic.

Suitable for a wide variety of residential and commercial furniture, the Salice Air Holders for Arm combine durable construction, refined styling and straightforward installation, making them an ideal choice for premium cabinet manufacturing and bespoke joinery projects. Also available in **Nickel Plated** and **Titanium** finishes to complement matching Salice Air hardware.
