Salice Recessed Magnetic Release Device - ø 10 mm - 40mm - Grey

Variant code: DPMSNG

The **Salice Recessed Magnetic Release Device** is a premium push-to-open mechanism designed to create clean, handle-free furniture with smooth and reliable operation. Featuring a compact **Ø10mm x 40mm** body, this concealed release device installs neatly within the cabinet panel, providing an elegant solution for modern kitchens, wardrobes, bathroom furniture and bespoke cabinetry where minimalist styling is desired.

Engineered for dependable performance, the magnetic push-to-open mechanism allows cabinet doors and drawers to be opened with a simple press, eliminating the need for external handles. The integrated magnet securely retains the door or drawer in the closed position when used with a compatible **Salice magnetic retaining catch**, delivering positive engagement and consistent opening action. Its recessed installation preserves clean design lines while maximising usable cabinet space.

Manufactured to Salice's renowned Italian engineering standards, the **Grey Recessed Magnetic Release Device** combines durability, precision and ease of installation, making it an ideal choice for professional furniture manufacturers, cabinet makers and high-quality DIY projects.

Product Features

- Salice recessed magnetic push-to-open release device
- Designed for handleless cabinet doors and drawers
- Compact Ø10mm diameter × 40mm length
- Integrated magnetic push-to-open mechanism
