

Salice Recessed Magentic Release Device – ø 10 mm – 40mm – Grey

Variant code: DPMSNG

Upgrade your contemporary furniture with the **Salice Recessed Magnetic Release Device**—a compact, powerful mechanism designed for **handleless** doors and drawers. This premium **push-to-open** device offers a sleek aesthetic, exceptional **reliability**, and superior **functionality**, making it the perfect choice for **modern kitchen** cabinets, **minimalist wardrobe** units, and sophisticated **home furniture** projects.

Key Features & Benefits

- **Handleless Design:** Achieves a truly **seamless** and **minimalist** look by eliminating the need for external handles.
- **Magnetic Release Action:** Provides a reliable and **positive opening** experience with a light touch. The built-in magnet ensures the door or drawer is securely held closed when not in use.
- **Recessed Installation:** The device is **concealed** within the panel, ensuring a clean finish and maximising internal storage space. The design is perfect for achieving a high-end, **flush-fronted** appearance.
 - **Optimal Dimensions:**
 - **Diameter:** ø 10 mm Ultra-slim profile for discrete installation.
 - **Length:** 40 mm (Provides sufficient travel for effective opening).
- **Durable Construction:** Built with **high-quality** materials, this grey release device is engineered for long-term use and consistent **performance**.
- **Easy Installation:** Designed for straightforward drilling and mounting, making it an ideal choice for both **professional cabinet makers** and **DIY enthusiasts**.
