

## Salice Retaining Catch

Variant code: DP28SN9

**Salice Pacta Compact Hinge Retaining Catch**, a small but powerful component designed for the innovative **Salice Pacta drop-down flap door system**. This essential magnetic catch ensures a secure closure, offering **enhanced stability** and preventing accidental openings, especially crucial for **handle-less push-to-open** Pacta applications.

It's the perfect accessory to complement your **soft-open** and **decelerated-opening** Pacta hinges, delivering a flawlessly smooth and reliably secure user experience.

### Key Features & Benefits

- **Secure Magnetic Closure:** The retaining catch works with the magnetic release device (sold separately) to **significantly increase** the door's holding strength, guaranteeing a **firm** and **reliable** close.
- **Essential for Push-to-Open Systems:** A vital accessory for **handle-less** cabinetry, providing the necessary retention for the "Push" mechanism to operate effectively.
- **Adjustable and Easy to Install:** Designed for insertion into the door typically 15 mm hole, 11mm deep with **depth adjustment** capability -0.5 mm to +2.5 mm, ensuring a **perfect alignment** for a **seamless** finish.
- **Genuine Salice Quality:** As an original component for the renowned Salice Pacta hinge, you benefit from **superior Italian design** and **proven durability**.
- **Versatile Application:** Ideal for **kitchen cabinets, living room furniture, hotel furnishings**, or any application using the Pacta drop-flap hinge system to create convenient bar shelves, writing surfaces, or extended tables.
