Salice Retaining Round Adjustable Magnetic Catch - ø16.6 mm

Variant code: DP39XXG

The **Salice Round Adjustable Magnetic Retaining Catch** is a premium concealed magnetic catch designed to work seamlessly with the **Salice Push-to-Open System**. Engineered in Italy, this compact retaining catch provides reliable magnetic holding power for handleless furniture, ensuring cabinet doors remain securely closed until activated by a compatible Salice magnetic push release device. Its discreet recessed installation preserves the clean, minimalist appearance demanded by modern furniture designs.

The **DP39 retaining catch** is itself magnetic and, when paired with the **Salice DPM magnetic release device**, increases the door's holding strength against the cabinet side by approximately **30%**, helping to prevent accidental door openings. Designed for easy installation, the catch requires a **15mm diameter x 11mm deep** drilled hole and features an adjustable depth range from **-0.5mm to +2.5mm**, allowing precise alignment to compensate for installation tolerances or minor door movement over time.

With its compact **Ø16.6mm** design, the Salice Round Adjustable Magnetic Retaining Catch is ideal for premium handleless kitchens, wardrobes, furniture and bespoke joinery, delivering dependable magnetic retention, precise adjustment and long-lasting performance.
