

## Shakespeare Latch Set – Pewter

**Variant code: 33685**

Our shakespeare latch is intricately designed and is a decorative alternative to a thumb latch.

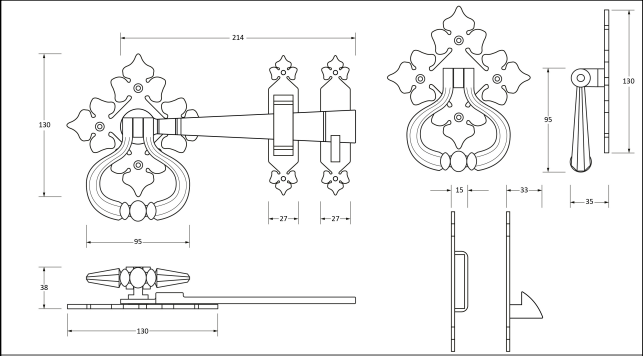

The latch bar should be fitted on the inward face of your door. When the ring is turned it lifts the latch bar to open the door.

- The latch bar is restricted by the screw on staple provided.
- Reversible design suitable for use on the left or right hand side of your door.
- Supplied with matching SS wood screws.

Our pewter patina finish is forged from a durable base of steel and is a fine example of how our unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes but also offers a contemporary alternative in more modern settings.

Property	Value
Finish	Pewter Patina
Range	Shakespeare
Overall Length (mm)	214

Gallery

Technical drawing of the Shakespeare Latch Set. The drawing includes a front view of the latch assembly with dimensions: 214mm width, 130mm height, 95mm width of the base, and 27mm spacing between the latch and handle. A side view shows the latch mechanism with dimensions: 15mm, 33mm, and 35mm. A detail view shows the handle with dimensions: 130mm length and 38mm width. The drawing also includes a small detail of the latch mechanism.

Please Note, due to the hand crafted nature of our products all measurements are approximate and should be used as a guide only.
