

Shakespeare Latch Set – Pewter

Variant code: 33685

Our shakespeare latch is intricately designed and is a decorative alternative to a thumb latch.

The latch bar should be fitted on the inward face of your door. When the ring is turned it lifts the latch bar to open the door.

- The latch bar is restricted by the screw on staple provided.
- Reversible design suitable for use on the left or right hand side of your door.
- Supplied with matching SS wood screws.

Our pewter patina finish is forged from a durable base of steel and is a fine example of how our unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes but also offers a contemporary alternative in more modern settings.
