

Slide Arm Hold Open Facility

Variant code: SA.HO

Slide Arm Hold Open Facility is a genuine accessory designed to add a convenient hold-open function to compatible Rutland slide arm door closers. Engineered for commercial environments where doors are regularly required to remain open, this mechanism securely retains the door at a selected position, improving accessibility and ease of movement while allowing normal self-closing operation to resume when released.

Ideal for busy offices, schools, hospitals, hotels and public buildings, the hold open facility provides greater flexibility by allowing doors to remain open during periods of high traffic, deliveries or ventilation. The mechanism integrates seamlessly with compatible Rutland slide rail systems, maintaining the clean, low-profile appearance of the door closer while providing reliable and consistent performance.

Manufactured from durable, commercial-grade materials, the Rutland Slide Arm Hold Open Facility is designed for long service life and dependable operation. It is quick to install and offers an effective upgrade for compatible slide arm door closer installations where controlled hold-open functionality is required.

Product Features

- Genuine Rutland slide arm hold open accessory
- Adds hold-open functionality to compatible slide arm door closers
- Allows doors to be held securely in the open position
