Slide Rail Cushion Stop & Limit Angle Block

Variant code: SA.CS

Slide Rail Cushion Stop & Limit Angle Block is a **genuine slide rail accessory** designed for compatible **Rutland slide arm door closers**. Engineered to cushion the opening action while limiting the maximum opening angle, this accessory helps protect doors, frames and surrounding walls from damage caused by excessive door movement in high-traffic commercial environments.

Manufactured from durable, heavy-duty materials, the cushion stop absorbs impact when the door reaches its predetermined opening position, reducing stress on the door closer and associated ironmongery. The adjustable limit angle function allows installers to restrict the opening angle to suit the application, helping prevent collisions with adjacent walls, furniture or fixtures while maintaining safe and controlled door operation.

Designed for quick installation within compatible slide rail systems, the cushion stop and limit angle block is easy to fit and adjust, making it an ideal addition to new installations or existing door closer systems. Its robust construction ensures long-lasting performance while helping extend the service life of the door closer and door assembly.

Ideal for commercial and public buildings, the Slide Rail Cushion Stop & Limit Angle Block provides additional protection, improved control and enhanced durability for slide rail door closer installations.

Product Features

- **Slide rail cushion stop and limit angle block**
- Designed for compatible **Rutland slide rail door closers**
- Cushions door opening to reduce impact
- Adjustable door opening angle limitation
- Helps protect doors, frames and surrounding walls
- Durable commercial-grade construction
- Direct-fit slide rail accessory
- Quick and easy installation

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- **Reduces impact when the door reaches its opening limit**
- **Helps prevent damage to doors, walls and adjacent fixtures**
- **Extends the service life of the door closer system**
- Provides greater control over maximum door opening angle
- Minimises wear on door hardware
- Easy to install and adjust

Technical Characteristics

- **Product Type:** Slide Rail Cushion Stop & Limit Angle Block
- **Brand:** Rutland
- **Compatibility:** Compatible Rutland Slide Rail Door Closers
- **Function:** Door Opening Cushion Stop and Opening Angle Limiter
- **Construction:** Heavy-Duty Commercial Components
- **Installation:** Slide Rail Mounted
- **Adjustment:** Variable Opening Angle Limitation
- **Application:** Door Closer Slide Rail Systems

Applications

Slide Rail Cushion Stop & Limit Angle Block is ideal for **offices, schools, hospitals, healthcare facilities, hotels, retail premises, apartment buildings and other commercial or public buildings** using **Rutland slide rail door closers**. Designed to limit the opening angle and cushion the door at full opening, it helps protect doors, frames and surrounding surfaces while improving the longevity and performance of the complete door closer system.
