

Slim Adjustable Cabinet Hanger – Each

Variant code: AWH01000

Slim Adjustable Cabinet Hanger is a heavy-duty concealed cabinet suspension system designed to provide fast, accurate installation without requiring adjustment holes inside the cabinet. Measuring just **5mm thick**, this innovative hanger allows all adjustments to be made from the rear of the bracket, preserving the clean internal appearance of cabinetry while offering exceptional installation flexibility. Supplied individually, it is ideal for wall-mounted cabinets, floating furniture and decorative wall panelling.

Often described as an **adjustable split batten**, this cabinet hanger offers both **vertical height adjustment via an Allen key** and excellent **lateral adjustment**, making it easy to achieve perfect alignment after installation. With a robust **700N (approximately 71kg) load capacity**, it provides dependable support for demanding residential and commercial applications. An integrated **anti-release device** further enhances safety by helping prevent accidental disengagement from the wall bracket.

Designed for cabinet makers, joiners and professional installers, the Slim Adjustable Cabinet Hanger delivers a discreet, high-strength fixing solution that simplifies installation while maintaining a premium, hole-free cabinet interior.

Product Features

- Slim concealed adjustable cabinet hanger
- Only 5mm thick
