Spike Pin - Pair - Beeswax

Variant code: 33190

Can be used as a replacement part for our 24" band & spike hinge (91900). Can also be used as an alternative fitting method with our 24" cranked hook & band hinge (91471).

Supplied as a pair.

Our beeswax finish is the most authentic finish for steel. After forging, the colours left in the steel range from blue to deep red ochre. To preserve these beautiful colours, our beeswax products are dipped into hot beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when the products are fitted internally and properly maintained. An extremely natural finish and a far softer alternative to a black powder coated finish.

Property	Value
Finish	Beeswax
Width (mm)	15
Range	Spike
Overall Length (mm)	190
