

Stainless Steel Flush Ring Pull

Variant code: 26901

Stainless Steel Flush Ring Pull is a high-quality recessed pull designed to provide a clean, minimalist solution for opening sliding, hinged and access doors. Manufactured from durable stainless steel, the flush-fitting design sits neatly within the door surface, reducing protrusions while delivering a modern, professional appearance. Ideal for commercial, marine and residential applications, it combines robust performance with understated styling.

The recessed ring lifts easily when required, providing a comfortable grip for opening doors, access panels and hatches before returning flush into the housing when not in use. Its corrosion-resistant stainless steel construction makes it suitable for demanding environments where long-term durability and resistance to wear are essential.

Designed for straightforward installation, the Sugatsune Flush Ring Pull offers a reliable and attractive hardware solution for furniture, cabinetry and architectural joinery. Its flush profile helps prevent snagging while maintaining a sleek, contemporary finish.

Product Features

- Premium recessed flush ring pull
- Manufactured from stainless steel
- Flush-fitting design for a clean appearance
- Fold-away pull ring
- Corrosion-resistant construction
- Smooth and comfortable operation
- Strong and durable for long service life
