Blum System Screws - Countersunk Head - 6 mm x 11.5 mm - Nickel

Variant code: 661.1150.HG

Blum System Screws - Countersunk Head - 6mm is designed to provide secure and consistent fixing for Blum cabinet hardware within system-drilled cabinetry. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, this screw supports reliable installation of hinges, mounting plates and related components used throughout Blum cabinet systems.

The screw features a **6mm diameter** and is suitable for installations requiring **11.5mm or 13mm screw lengths**, providing dependable mechanical retention within cabinet panels and hardware assemblies. Its **countersunk head design** allows the screw to sit flush within the fixing point of the hardware component, ensuring correct seating and alignment during installation while maintaining a clean and professional cabinet finish.

Designed specifically for use with **Blum system hardware**, the screw integrates with common cabinet drilling patterns used in modern furniture manufacturing. This allows cabinetmakers and installers to position hardware accurately and achieve consistent results across multiple cabinet assemblies.

Manufactured from durable steel, the screw is engineered to withstand regular cabinet use while maintaining the long-term fastening reliability expected from Blum hardware systems. Its precision design ensures compatibility with Blum hinges, mounting plates and other cabinet fittings used in residential and commercial furniture installations.

Product Features

- **System screw** designed for Blum cabinet hardware installations
- **6mm diameter** for secure cabinet panel fixing
- Suitable for **11.5mm and 13mm screw length variations**
- **Countersunk head** for flush hardware installation

- Compatible with Blum hinges and mounting plates
- Durable steel construction for long-term performance

Product Benefits

- Provides reliable fixing for cabinet hardware components
- Ensures flush seating of hinges and mounting plates
- Supports consistent installation within system-drilled cabinetry
- Maintains a clean and professional cabinet assembly
- Helps ensure accurate hardware alignment
- Compatible with Blum cabinet hardware systems

Technical Characteristics

- Screw diameter: **6mm**
- Nominal length options: **11.5mm and 13mm**
- **Countersunk head** design
- Designed for use in cabinet panel installations
- Compatible with Blum cabinet hardware systems
- Durable steel construction for dependable fastening

Applications

This system screw is used to secure **Blum cabinet hardware components** such as hinges, mounting plates and related fittings to cabinet panels in system-drilled cabinetry. It is commonly specified in kitchen cabinets, wardrobes and fitted furniture where consistent hardware positioning and dependable fastening are required during cabinet manufacturing and installation.
