Blum Tandembox Cutlery Tray Insert - Metallic Silver - 500mm Depth - 450mm Width

Variant code: BL472.364

Blum Tandembox Cutlery Tray Insert - Metallic Silver - 500mm Depth is designed to provide organised internal storage within TANDEMBOX drawer systems. Engineered by Blum to complement modern drawer interiors, this insert offers a practical solution for separating and arranging cutlery and small utensils while maintaining a clean and structured layout.

Configured for a fixed **500mm drawer depth**, the insert is designed to fit within standard TANDEMBOX drawer configurations. It is suitable for a range of **cabinet widths**, allowing flexibility in drawer sizing while maintaining consistent organisation. The internal compartment layout is optimised for efficient storage, helping to keep items accessible and neatly arranged during everyday use.

Manufactured from durable materials and finished in **Metallic Silver**, the cutlery tray integrates seamlessly within the drawer system, providing a consistent internal aesthetic. Designed for straightforward placement within the drawer base, it requires no complex installation and can be easily removed for cleaning or reconfiguration.

Product Features

- Designed for **Blum TANDEMBOX drawer systems**
- Configured for **500mm drawer depth**
- Suitable for a range of **cabinet widths**
- Integrated compartments for organised storage

- Maintains a clean and structured internal layout
- Allows flexibility across different cabinet widths
- Supports efficient day-to-day kitchen use

Technical Characteristics

- Designed for use within **TANDEMBOX drawers**
- Suitable for **500mm nominal drawer depth**
- Compatible with varying cabinet widths
- Insert sits directly within drawer base
- No fixing required for installation
- Durable construction for repeated use

Applications

This cutlery tray insert is suitable for kitchen drawer applications where organised storage of utensils is required. It is commonly used in cutlery drawers within domestic kitchens, apartments and fitted furniture projects. The compatibility with different cabinet widths makes it suitable for both standard and bespoke cabinetry, while the 500mm depth ensures alignment with common drawer sizes in modern kitchen design.
