Blum Tandem Runner - Front Adjuster

Variant code: 295.1000

Blum TANDEM Front Adjuster is designed to enable precise alignment of drawer fronts within Blum TANDEM runner systems, ensuring a clean and consistent cabinet finish. Manufactured by **Blum**, a globally recognised specialist in cabinet hardware, this component forms an essential part of achieving accurate drawer positioning and professional installation results.

The front adjuster allows for **fine adjustment of the drawer front**, enabling installers to correct alignment in multiple directions to achieve even gaps and consistent reveals. This ensures a high-quality finish across cabinetry, particularly in applications where visual precision is critical.

Designed for seamless integration with **Blum TANDEM concealed runners**, the adjuster works without affecting the smooth running performance of the drawer system. It supports efficient installation and simplifies on-site adjustments, reducing fitting time while improving overall accuracy.

Manufactured for durability and reliability, the front adjuster is compatible across a range of **nominal runner lengths**, making it a versatile solution for different cabinet depths and drawer configurations.

Product Features

- **Front adjustment component for TANDEM drawer systems**
- Enables **precise drawer front alignment**
- Supports **consistent gaps and reveals**
- Compatible with **Blum TANDEM runners**
- Durable construction for long-term use
- Suitable for **various nominal runner lengths**

Product Benefits

SWS HARDWARE
Tel: 01626 333900
Email: info@swshardware.com

- Allows **accurate and professional drawer alignment**
- Improves **overall cabinet appearance and finish quality**
- Reduces **installation time with easy adjustment**
- Maintains **smooth drawer operation**
- Enhances **installation flexibility across cabinet sizes**
- Supports **consistent results in multi-drawer configurations**

Technical Characteristics

- Designed for use with **Blum TANDEM concealed runner systems**
- Installed as part of the **drawer front fixing system**
- Enables **fine adjustment of drawer front positioning**
- Compatible with **multiple nominal runner lengths**
- Engineered for **precise and reliable adjustment performance**

Applications

This front adjuster is used in **kitchen drawers, bedroom furniture, office storage and fitted cabinetry** where precise drawer front alignment is required. It is particularly important in installations with multiple drawers, ensuring consistent spacing and a uniform appearance. Suitable for both **residential and light commercial joinery projects**, it supports efficient installation and high-quality finishing within Blum TANDEM drawer systems.
