Blum Tandem Runner - Locking Device - Right Hand

Variant code: T51.1700RH

Blum TANDEM Locking Device - Left & Right Hand is designed to securely connect TANDEM runners to wooden drawers, ensuring stable engagement and reliable operation within the Blum concealed runner system. Manufactured by **Blum**, a globally recognised specialist in cabinet hardware, this locking device forms an essential component in achieving correct drawer installation and performance.

The locking device is fitted to the underside of the drawer front and works in conjunction with **Blum TANDEM runners**, providing a secure fixing point that holds the drawer firmly in place during operation. Once installed, it ensures consistent alignment and prevents unwanted movement, contributing to smooth and controlled drawer running.

Designed as a **left and right-hand set**, the locking devices provide balanced fixing on both sides of the drawer, ensuring even load distribution and stable engagement with the runner system. The integrated release function allows the drawer to be easily removed when required, supporting efficient installation, adjustment and maintenance.

Manufactured for durability and precision, the locking device integrates seamlessly with Blum TANDEM systems across a range of **nominal runner lengths**, ensuring compatibility regardless of drawer depth or runner size.

Product Features

- **Locking device set for left and right-hand installation**
- Designed for **Blum TANDEM runner systems**
- Secure connection between drawer and runner
- Integrated **release mechanism for drawer removal**
- Suitable for **various nominal runner lengths**

- Durable construction for long-term use

Product Benefits

- Ensures **secure and stable drawer attachment**
- Maintains **accurate drawer alignment** during operation
- Allows **quick and easy drawer removal** for maintenance
- Supports **smooth and consistent drawer movement**
- Compatible across **multiple TANDEM runner sizes**
- Improves overall **installation efficiency**

Technical Characteristics

- Designed for use with **Blum TANDEM concealed runners**
- Installed to the **underside of wooden drawer fronts**
- Supplied as **left and right-hand components**
- Compatible with **full and single extension TANDEM systems**
- Suitable for **all corresponding nominal runner lengths**

Applications

This locking device is used in conjunction with **Blum TANDEM runners** in **kitchen drawers, bedroom furniture, office storage and fitted cabinetry**. It ensures secure drawer attachment and reliable operation while allowing easy removal for adjustment or servicing. Suitable for both **residential and light commercial joinery projects**, it is an essential component for achieving consistent performance and correct installation within Blum drawer systems.
