Blum Tandem Runner - Single Extension plus BLUMOTION - 30KG - 400mm

Variant code: 550H4000B

Blum TANDEM Runner - Single Extension plus BLUMOTION - 30kg is designed to deliver smooth, controlled and reliable drawer movement in modern cabinetry. Manufactured by **Blum**, a globally recognised leader in precision cabinet hardware, the TANDEM runner system combines concealed runner technology with **integrated BLUMOTION soft-close functionality**, ensuring quiet and consistent drawer operation across a wide range of furniture applications.

The runner provides **single extension**, allowing the drawer to open to a practical access position while maintaining stable and controlled movement. The integrated **BLUMOTION soft-close mechanism** ensures drawers close smoothly and quietly, reducing closing impact and enhancing user comfort during everyday use. This controlled closing action also helps protect cabinet structures and drawer components from unnecessary wear.

Installed beneath the drawer, the TANDEM system offers a **concealed runner solution** that preserves the clean internal appearance of cabinetry while maintaining smooth and stable running performance. Engineered for reliability, the runner supports loads of up to **30kg**, making it suitable for frequently used drawers in kitchens, bedrooms, storage furniture and fitted cabinetry.

Manufactured with a durable **Nickel finish**, the runner integrates seamlessly with Blum drawer systems and accessories while maintaining compatibility within the broader Blum cabinet hardware platform. The system is available in a range of **nominal lengths**, allowing installers and manufacturers to select the appropriate runner size to suit cabinet depth while ensuring consistent performance.

Product Features

- **Single extension concealed drawer runner system**
- Integrated **BLUMOTION soft-close**

Tel: 01626 333900
