

Blum Tandembox Carcass Profile – Tip-on – 50kg – 270mm NL – Right Hand

Variant code: 579.2701TRH

Blum Tandembox Carcass Profile – Tip-on – 50kg – 270mm NL is designed to support handle-less drawer operation within the TANDEMBOX system by enabling reliable push-to-open functionality. Engineered by Blum for precision and durability, this carcass profile integrates with TIP-ON mechanisms to provide smooth and consistent drawer opening without the need for handles.

Configured for **270mm nominal length** applications, this carcass profile is suitable for compact drawer installations while maintaining stable performance under higher load requirements. The TIP-ON system allows drawers to open with a light press, supporting modern handle-free cabinetry designs. Supplied for **left and right-hand installation**, the profile ensures correct system balance and consistent operation across the drawer assembly.

Manufactured to integrate seamlessly within the Blum TANDEMBOX platform, the carcass profile forms part of a complete drawer system when paired with compatible runners, drawer sides and TIP-ON units. Its robust construction supports reliable long-term performance in both residential and light commercial furniture applications.

Product Features

- Designed for **Blum TANDEMBOX drawer systems**
- Compatible with **TIP-ON push-to-open functionality**
- Designed for **50kg load applications**
- Suitable for **270mm nominal length** drawers
- Supplied for **left and right-hand installation**
- Precision-engineered for accurate system integration

Product Benefits

- Enables clean, handle-less drawer design
- Provides smooth and consistent opening

- performance
- Supports reliable operation in compact drawer applications
 - Maintains stable and balanced drawer movement
 - Enhances usability in modern cabinetry
 - Ensures long-term system reliability

Technical Characteristics

- Designed for use with **Blum TANDEMBOX runners**
- Compatible with TIP-ON mechanical opening units
- Supplied for left and right-hand configurations
- Designed for **270mm nominal length** drawers
- Requires correct system pairing for optimal performance
- Precision-manufactured for consistent fitment

Applications

This carcass profile is suitable for kitchen, bedroom and fitted furniture applications where compact drawers and handle-less operation are required. It is commonly used in smaller storage drawers and internal drawer configurations, where the TIP-ON system allows drawers to open with a light touch. The inclusion of left and right-hand components ensures correct installation and reliable performance across a variety of cabinetry layouts.
