

TECTUS 3D Adjustable Hinge 250 x 30mm 160KG Rebated Doors - SW124 F1 Satin Chrome Look

Variant code: TE680.3D.FD.F1

The concealed hinge solution for rebated timber entrance doors

Making something invisible is also design. The TECTUS hinge system enables unrebated doors to be optimally integrated into straight and flush room structures. This perfected technology has been successfully used in the domestic and commercial construction industries for a number of years.

With product innovation TECTUS TE 680 3D FD, SIMONSWERK has successfully further developed the TECTUS product brand, offering this new model version as a solution for conventionally rebated timber entrance doors. Easy mounting and convenient 3D adjustment make installation easy, while a circumferential seal ensures the required level of impermeability around the hinges. The innovative hinge system for timber entrance doors further impresses with a load capacity of 160 kg.
