Blum Movento/Merivobox Synchronisation Linkage for Cutting to Size - Tip-On - Blumotion

Variant code: T60.1125W

Enhance Cabinet Functionality with Movento Tip-On Blumotion Synchronisation Linkage - Cut-to-Size Solution for Seamless Soft-Close and Handle-Less Design

Optimise your cabinet designs and manufacturing processes with the **Movento Tip-On Blumotion Synchronisation Linkage for Cutting to Size**. This high-quality component from Blum provides a reliable and efficient solution for achieving perfectly synchronised soft-close functionality in handle-less drawers and pull-outs utilising the Movento runner system.

This linkage enables cabinet makers, kitchen manufacturers, and furniture producers to create premium, user-friendly furniture with consistent and smooth operation. The **cut-to-size feature** offers unparalleled flexibility, allowing for precise adjustments to suit various drawer widths and cabinet configurations, minimising waste and streamlining production.

Key Benefits for Your Business:

- **Seamless Handle-Less Design:** Enables the creation of sleek, modern furniture with effortless touch-to-open functionality.
- **Synchronised Soft-Close:** Guarantees consistent and quiet closing action across the entire drawer width, enhancing perceived quality and user satisfaction.
- **Precise Cut-to-Size Capability:** Reduces material waste and simplifies installation by allowing for exact length adjustments on-site or in the workshop.
- **Reliable Blum Quality:** Benefit from the renowned durability and performance of Blum hardware, ensuring long-lasting functionality and minimising warranty claims.
- **Enhanced Production Efficiency:** Streamlined installation and adaptable sizing contribute to faster assembly times and reduced labour costs.
