Touch Latch for Pocket Doors Kits 42692 & 42693

Variant code: 46295

Pocket Door hardware is a great way to fit a door when space is limited, or when opening in/out would be impossible due to restrictions.

This push-to-open touch latch allows a pocket door to sit 100% into the wall without the need for edge fix handles or finger pulls.

Device is fitted on the back of the door and a gentle press on the door edge will release the door into the opening.

To be used in conjunction with pocket door kits (46292 & 46293).
