Woodstikk® UF One-Shot Powder Adhesive - 3kg (Cascamite)

Variant code: 22111

Woodstikk® One Shot is a one-component urea one shot powder adhesive, which only requires mixing with water to make it ready for use. Used for many woodworking applications including veneering, laminating and assembly.

Woodstikk® One Shot is suitable both for industrial use as well as for smaller bonding operations. It is especially suitable for joinery, cabinet work and assembly gluing, particularly when small amounts of glue mix are needed, or when demand is such that the use of a liquid adhesive is uneconomic.

FEATURED PROPERTIES:

- Meets requirements of EN12765 Class C3
- Good water resistance
- Quick curing
- Very strong bond
- Can be mixed in small batches

PREPARATION AND APPLICATION

Ensure that the surfaces to be bonded are smooth, clean and free from dust or other deposits. Wood, plywood, laminated plastics should be of uniform thickness. Woodstikk® One Shot should be mixed 2 parts by weight with 1 part by weight of water. It is not recommended that Woodstikk® One Shot is mixed by volume.
